

June 2026

Miss Beth's Class

elizreckamp@gmail.com

To kick off our Summer Enrichment theme Habitats of the World we will first be learning about deserts. We'll get to see what types of plants and animals live in deserts and see what different deserts look like around the world! We'll take some time to look at some desert plants that we've cultivated to grow in our own homes like jade and aloe.

News and Notes:

A new student, Kingston, will be joining our class this month!

Our staff schedules change over the summer so you'll be seeing some new-to-you faces assisting in our classroom. This month you'll be seeing: Miss Sharon, Miss Renee, Miss Gina (our Spanish teacher), Miss Ashley P., Miss Natalie, and Miss Ara.

May Recap:

This past month in our practical life area the children had a great time with table scrubbing work. Through this work they strengthened their ability to sequence steps of a task and they increased their concentration. They also had lots of fun playing with the soap and water. Cutting paper and string with scissors continued to garner the children's interest. Our language area had a focus on insects. The children enjoyed manipulating toy insects and learning their names. We also hatched

butterflies! We got our caterpillars at the beginning of April and we checked on them daily for a month until they were ready to be released as butterflies. The children loved counting how many caterpillars there were. We also discussed the life cycle of the butterfly- from caterpillar to chrysalis, to butterfly. We gathered outside to release the butterflies and watch them fly away.

June birthdays:

Happy birthday to Nora who will turn 2!

Congratulations:

I want to congratulate all of my students who will be entering preschool in the fall! They have grown so much and are ready to take this next step. We are excited that most of them will spend some time with us this summer before transitioning.

Congratulations to:

Ayla	Naomi
Elias	Porter
Elliott	Sachi
Elowyn	Winnie
Esmé	Ximena
Gio
